"The Punch with a Curve"
- Specialty & Custom

With tolerances as close as +/- .0005", Ameri-Ken punches knockout the competition! Whether your punch-out is a simple hole or a precision membrane switch, Ameri-Ken punches save you money and headaches. They prevent breakdown, last longer, and give a greater value.

Vacuum Carbonitriding

All Ameri-Ken punches are case hardened by vacuum carbonitriding, an exclusive heat treating process performed in a scientifically controlled vacuum environment, preventing the formation of thin, weak spots which shorten the cutting life of ordinary punches. Punch quality never deviates, uniformity is absolute! The photo shows the hardened case uniformity of an Ameri-Ken punch.

Take the Guess Work out of Sizes

With cut edge and base size strategically printed on our punches, and visible when mounted in 5/8" dieboard, the guessing game is over! Punch marking is available on all our tube and feed-thru punches, plus many others! Ask for availability on your next order.

Save Time & Hassle

Order punch rubber inserted in your punches. No more hassles inserting them yourself at the last minute!

Quality

All Ameri-Ken diecutting punches are produced on CNC machinery with state of the art "Vacuum Heat Treating" for the absolute best hardness control and consistency from batch to batch. We use "Mill Spec" tubing as opposed to "off the shelf" tubing for tubes and feed-thrus because "off the shelf" tubing normally has a wider tolerance range which can make punch insertion in a dieboard too tight or spring insertion in punches too loose.

Price

All Ameri-Ken Companies utilize up-to-date technology, not only to produce the highest quality products, but to ensure we remain efficient, which allows us to provide our customers with competitive pricing.

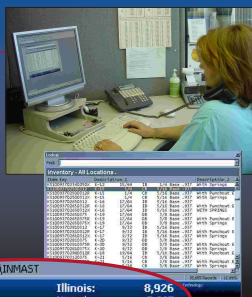

In-Stock Availability

Over 3 MILLION punches in stock and ready to ship! At Ameri-Ken, we believe our inventory is our best salesperson! Our inventory is second to none in the industry and we stock more special sizes than any other supplier.

When it comes to diecutting punches, nobody beats Ameri-Ken. Next time you need a quality punch, at a competitive price, and you need it shipped today, call...

No more shopping around - One phone call gets instant answers!

Ameri-Ken is the only die supply company who has dedicated the resources to develop a customized, wide area network computer system. The program allows us to check inventory at all five locations with a click of a button! We can check our inventory of over 3 million punches with just one phone call. **We'll have your punch order processed before the competitors can determine if they have it in stock!**
